

Intensive Care Unit

VersaSuite's (ICU) module provides access to key information at-a-glance, and is seamlessly integrated with the rest of the patient's electronic health record.

- **Key Information at a Glance**
 - ⇒ See real-time vitals, medication & allergy lists, orders, results, fluid balance, and event log in one comprehensive view
 - ⇒ One-click access to vitals graphing
- **APACHE II Severity of Illness Scoring**
 - ⇒ Graph historical APACHE II scores over time
- **Seamlessly Integrated with the Entire EHR and HIS**
 - ⇒ Data put into the ICU is immediately available to all medical disciplines
 - ⇒ Information already on file automatically pulls into the ICU module
 - ⇒ Launch CPOE in one click
 - ⇒ Drug-drug, drug-allergy, drug-formulary checking
- **Device Interfacing**
 - ⇒ Automatically feed information directly into the patient's record
- **Integrated Clinical Decision Support (CDS) Engine**
 - ⇒ Completely configurable and programmable
- **Structured Summary notes**
 - ⇒ Produce structured and formatted summaries of the entire ICU stay
- **Adheres to All Interoperability Standards**
 - ⇒ DICOM, IHE, HL7 compliant + CCD & CCR import/export
- **HIPAA 5010 and ICD 10 Compliant**
