Revenue Cycle Management

VersaSuite provides fully integrated insurance claims processing for Institutional, Professional, Vision, and Dental plans. DME (Durable Medical Equipment) is supported via a robust inventory and material handling system that is fully integrated with the billing and claims process.

Electronic Health Record

VersaSuite-EHR supports every medical discipline and is seamlessly integrated with the rest of the product suite. This integration enables every conceivable form of information exchange—labs, tasks, medications, problems, clinical information, images, appointments, inventory orders and deductions, etc — between all modules at all times.

RIS/PACS

VersaSuite's DICOM-compliant RIS/PACS provides physicians with robust tools for fast navigation, viewing, and annotation so that doctors can provide the best possible care. VersaSuite is the only company in the world that offers structured template-ized electronic reporting through integration with the EHR.

Increased Revenues

Many physicians under code as a preventative measure against audits. VersaSuite delivers automatic E/M coding that follows coding guidelines exactly to generate the highest possible coding level, boosting revenues for many exams and procedures.

Extensive Reporting

VersaSuite features over 100 reports to help hospital administrators monitor every aspect of the enterprise: financial, inventory, insurance, HR, and more. VersaSuite also allows users to create custom reports.

Powerful Business Intelligence

Gain unprecedented insight into your data through our real-time event-driven analytics engine. Monitor re-admit patterns, key performance indicators, and outcomes. Our metrics will help your organization achieve substantial savings through gained efficiencies.

Enterprise Practice Management

VersaSuite-EPM offers integrated inpatient and outpatient scheduling for any type of resource, revenue cycle management, surgical and pharmaceutical inventory management, reporting, powerful business intelligence, and an integrated ERP suite including employee scheduling and time/attendance, payroll, and accounting.

Flexible CPOE

VersaSuite's CPOE allows physicians to quickly find, modify, and order comprehensive order sets. VersaSuite also provides a care-grid that enables care teams to easily identify, manage, and complete outstanding orders for all patients under their care. Order sets provided by Patient Order Sets, Provation, or Zynx.

EMAR

VersaSuite EMAR interfaces with barcode readers so that nurses can quickly scan medications to ensure proper medication delivery. Our EMAR checks to ensure patients' 5 rights - right patient, right medication, right dosage, right time, and right route.

Enterprise-Strength Solution

VersaSuite features an n-tier service-oriented architecture that allows thousands of users to access the database simultaneously from any number of locations. VersaSuite can even enable secure access from a patient's home.
